

Technical Enablers

TACKLING ORGANISED **EXPLOITATION** PROGRAMME

TOEX continues to develop and assess new technical capabilities in the fight against organised exploitation. Some of these tools are suitable for wider application across policing – with national IT hosting arranged so they can be leveraged for universal tactical & strategic purpose.

Savings

TOEX tools/apps provide
**invaluable
time-saving aids**
for policing investigations, building efficiencies and facilitating the discovery of **previously unknown insight**.

Translation of 211 million characters to date, for a
**total cost of
£1,700.**

A constabulary quoted £2,000 for manual translation of 6,000 lines of Iraqi text and a time envelope of two weeks. TOEX completed the task in
**under five minutes
for £0.83 pence.**

Automated Transcription of audio recordings will
save significant FTE,
releasing valuable resources from administrative tasks.

Independent Evaluation (Crest Advisory report – January 2023)

"The technical capabilities developed by TOEX are innovative and possess significant potential for the programme, wider law enforcement, and the state of police technology"
Crest Advisory

"TOEX is a clear example of the successes that can be achieved through aligning exceptional skills and knowledge with innovative tools that harness data effectively."
Crest Advisory

Collaboration & Impact

TOEX works with other national organisations/portfolios to address any gaps in the response to high-harm threats, as identified by the **Strategic Policing Requirement, ministerial priorities and HMICFRS**.

TOEX collaborates with industry and wider UKLE partners when **innovating technical enablers** that respond to organised exploitation threats.

From 2024, **Police Digital Service** will begin to host some TOEX Capabilities on their Shared Services platform for UKLE access, with Translation as the first application.

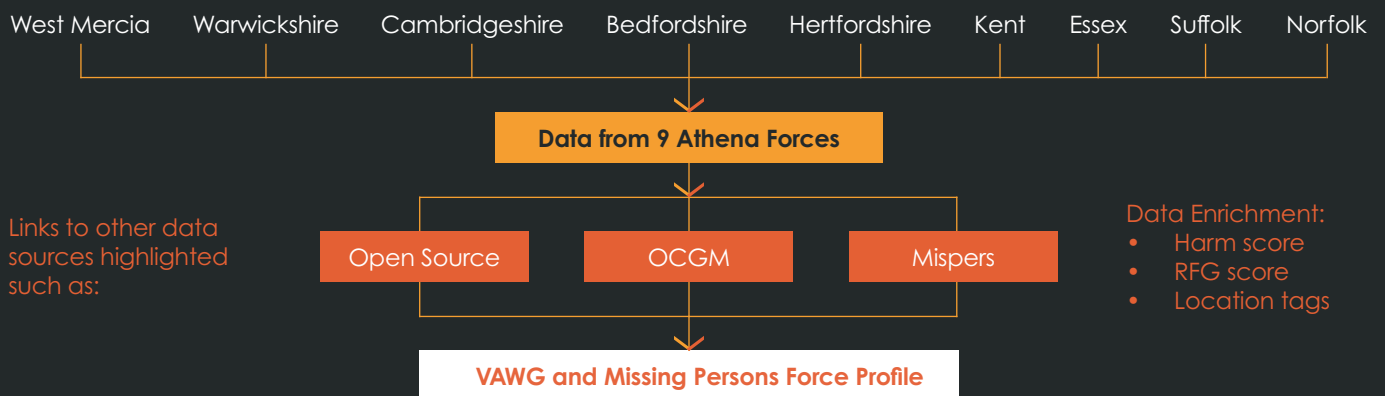

TOEX has skilled resources that leverage data to focus on high-harm offenders/victims; fill intelligence gaps; support effective force investigations & enrich strategic understanding.

TOEX is part of the **national CSE Taskforce**, combining effort with VKPP and Hydrant in the disruption of group-based CSE.

TOEX model data to identify **hot-spots of online CSAE abuse** to facilitate targeted UCOL deployment.

TOEX deliver **operational threat profiles** including VAWG, Missing Persons and ViSOR to 9 Forces in the current Data Platform - identifying individuals requiring intervention and tackling risk.
